2015 Summer Research Program in Biophysics

University of North Carolina at Chapel Hill
Priority Application Deadline: February 16, 2015

Interested in interdisciplinary science? Want to work in the fast-growing area of biomedical research? Looking to get some hands-on lab experience this summer? Check out the Summer Research Program in Biophysics, an 11 week course for undergraduate minority students at the University of North Carolina, Chapel Hill. Course expenses, travel costs, meals, and housing are covered.

Course includes:

• Lectures with UNC faculty members and seminars with visiting professors from graduate programs across the country
• Mentored research experience
• Team-building activities and field trips

Recommended Prerequisites:

• Studying quantitative science: chemistry, physics, biochemistry, and/or computer science
• 2 semesters of biology
• 2 semesters of calculus-level physics
• 3.0 cumulative or higher GPA in science courses

See what past students have to say about the Summer Research Program!

“...this has been the most useful and wonderful summer of my college career. Not only have I learned academically, I have built multiple bridges that can only benefit me in the future.”

“It has influenced me to take an additional science course at my university as well as has helped me create ideas for my senior project... the environment of the course created learning.”

“I learned new lab techniques as well as worked on the project independently. I was able to complete my own experiments and when I had questions or hit a snag, my mentor was available to help.”
