Title: Some Number Theoretical Physics

Speaker: David Gove

Time: Wednesday, Nov. 9, 2011 at 2:10

Place: Science III Room 213

Abstract: We will review some physics history (1880's to 1920's) wherein a combination of number theory and basic algebra combined to earn a Nobel Prize. Whose prize? Which year? Hint: this Nobel laureate also won fame as a soccer player – but not as much as his mathematician brother.
