COMPUTER ENGINEERING

Department of Computer and Electrical Engineering and Computer Science
School of Natural Sciences, Mathematics, and Engineering
Department Chair: Melissa Danforth
Program Office: Science Building III, 317
Telephone: (661) 654-3082
e-mail: ceecs@cs.csusb.edu
Website: www.cs.csusb.edu

Program Description

Computer Engineering is a field, which in some sense, resides between the long-established fields of Computer Science and Electrical Engineering. It is concerned with topics such as analog and digital circuit design, embedded controllers, computer hardware, system software, computer system design, data communication, signal processing, computer networks, robotics, computer vision, graphics and image processing, and other topics in computing where hardware plays an important role. Computer engineers often work with other engineers, physical scientists, and software engineers.

The Computer and Electrical Engineering and Computer Science Department moved into a new building in Fall 2008. The department administers its own local area network which includes multiple Unix/Linux servers, two software programming labs, a walk-in lab/tutoring center, one advanced workstation lab, an isolated network lab, an AI/visualization lab, a DSP/communications lab, one digital electronics hardware lab, a power systems/electronics lab, and a robotics/control systems lab. There is also a department library/major study room with computers available to students.

An important goal of the department is to enable students to work much more closely with faculty than they would be able to at larger universities. A detailed description of student learning goals and objectives can be found at http://www.cs.csusb.edu/all_abet.pdf.

Requirements for the Bachelor of Science Degree in Computer Engineering

SELF 0**
Junior Year Diversity Requirement 3
UD Thematic Areas C and D 0*
Capstone 0*
GWAR (Exam) or Class 0**

**Additional Units 1 unit***

*The following required major courses also meet general education requirements: ECE/ENGR 1618 and 1628 meet First-year Seminar, MATH 2310 or 2510 meets Foundational Skill A4, PHYS 2210 meets LD Area B1, PHIL 3318 meets UD Thematic Area C, and CMPS 4928 meets Capstone. Engineering majors have the following GE modifications: Foundational Skill A3, LD Area B2, 3 units of LD Area D, and UD Thematic Area D.

**The SELF requirement may be met by selecting another General Education course with a SELF overlay or by taking a stand-alone course. The GWAR may be satisfied by taking the GWAR exam, by taking another General Education course with a GWAR overlay, or by taking a stand-alone course. If a student opts to take a stand-alone course for either or both of these requirements, the course(s) will add additional units to that student’s general education pathway.

***Additional Units are required to meet the 120-unit requirement for graduation. Any accepted university units may be used to meet this requirement, including stand-alone courses for SELF and GWAR.

SB1440 units required - 58 units*

*Units required for graduation after completion of the Engineering (Computer Engineering focus) model curriculum and lower-division general education at a California community college.

Note: One (1) semester unit of credit normally represents one hour of in-class work and 2-3 hours of outside study per week.

Academic Regulation

A grade of C- is the minimal grade acceptable for progression in the CMPS 2010 and 2020 sequence.

Requirements for the Major in Computer Engineering

1. Lower Division (20 units)
   ECE/ENGR 1618, 1628, ECE/ENGR/PHYS 2070, CMPS 2010, 2020, 2120

2. Upper Division (32 units)
   CMPS 3240, 3600, ECE 3040, 3070, 3200, 3220, 3250, 4910, 4928

3. Upper Division Elective courses (12 units)
   Select 12 units of electives from the following:
   Digital Communications and Signal Processing:
   ECE 3230, 4220, 4250, 4260
   Control Systems, Robotics, and Digital Design:
   ECE 3280, 4240, 4570
   Image Processing and Computer Vision:
   ECE 4460, 4470

130
Special Topics and Independent Study
ECE 3770, 3771, 4770, 4771, 4800, 4860, 4870, 4890
Only a combined total of 4 units of ECE 377x, 477x, 48xx may be used for elective credit.

4. Required Cognate courses (31 units)
   MATH 2510 or 2310, MATH 2520 or 2320, MATH 2530, 2610, 3200, PHYS 2210, 2220, PHIL 3318

5. General Education Courses and Notes:
   Some of the courses required for the Computer Engineering major also satisfy General Education requirements. Students who complete each of these courses with the appropriate grade will also satisfy the GE requirement, even if they were to change majors:
   • ECE/ENGR 1618 and 1628 satisfy the First-year Seminar requirement.
   • ECE 4928 satisfies the Capstone requirement.
   • PHIL 3318 satisfies UD Thematic Area C and the Computer Engineering Ethics requirement.
   • PHYS 2210 satisfies LD Areas B1.
   • MATH 2510 or 2310 with a grade of C or better satisfies Foundational Skill A4.

   Engineering majors have the following General Education Modifications (GEMs), which means they do not have to take courses to satisfy these GE requirements. These GEMs are specific to the three engineering majors (Computer Engineering, Electrical Engineering and Engineering Sciences). Students who change to another major will not keep the modifications:
   • Foundational Skill A3 is embedded in PHYS 2210, 2220 and ECE/ENGR/PHYS 2070.
   • LD Area B2 is embedded throughout the curriculum.
   • 3 units of LD Area D is met through EAC/ABET outcomes 3c and 3h.
   • UD Thematic Area D is met through EAC/ABET outcomes 3c and 3h.

   Note: Several of the courses required for Computer Engineering are listed under the Computer Science Degree Program (CMPS prefix). Additionally, all Computer Engineering and Electrical Engineering courses descriptions are listed under the Computer Engineering Degree Program and carry the ECE prefix.
