

**Guided Reflection – Instruction** (after writing and teaching module)

1. Summarize the data you have collected from your teaching. (student samples etc)
2. What target competencies did you choose?
3. What did you learn while writing and teaching your module?
4. What did you struggle with while writing, planning and teaching?
5. Are you satisfied with your module?
6. If you are not satisfied, what areas do you feel need more work? Did you have alternative assignments if something did not work? If not, how would you alter the assignments to make it more useful?
7. What other comments or reflections do you have on the experience of writing and teaching a module?
8. What comments do you have on the instruction you did between the pre and post assessments (the 75 days of the study)? What strategies did you use that you had not used before? How did the strategies help? How has this experience change your teaching?
