

CSU Bakersfield Residential Network (ResNet) Acceptable Use Policy

Your ResNet connection is designed to allow CSU Bakersfield students the ability to check on-campus email, access library databases, and browse the Internet. It is your sole responsibility to utilize this service appropriately. By connecting a computer to ResNet, you have stated that you have read and accepted the terms stated in the ResNet acceptable use policy and are bound to and required to adhere to all aspects of the CSU Bakersfield acceptable use policy, 4cNet acceptable use policy and all university, city, county, state and federal regulations. This acceptable use policy and all computer/network related policies and regulations is located on the web at <http://www.csub.edu/resnet>.

The following are regulations for use of CSU Bakersfield's ResNet service. This list is not inclusive and may be modified in writing, at any time. Any violation of these regulations may be cause for revocation of these privileges.

- ResNet services, equipment, wiring or jacks may not be altered nor extended beyond the location of their intended use. Data jacks/wiring may not be altered. The use of phone splitters in data jacks is expressly forbidden. The use of hubs, switches, wireless access points are also forbidden.
- ResNet may not be used to provide Internet access to anyone not formally affiliated with the University. FTP, HTTP, and Telnet connections to ResNet from outside the University, direct or via proxy, are not allowed. This also includes providing peer-to-peer networking via applications such as Napster, Gnutella, KazAa, etc. A web server for student web pages is available through the University's Web Services department.
- Users may not run any programs that interfere with ResNet or network services. In particular, setting up DHCP and proxy servers are expressly forbidden.
- Users may not run or distribute malicious software that adversely affects other user systems or network systems.

- The ResNet service is a shared resource. Excessive use of the network, which interferes with other users, is not permitted. Excessive use will be defined by the University's Network Services. High bandwidth applications may be blocked or limited from ResNet as needed.
- ResNet may not be used for commercial or profit making enterprise. Use of these resources for commercial gain is in opposition to the non-profit status of the University.
- Users must follow proper ResNet connection procedures. Users may not use or spoof any network address not specifically assigned to them.
- Users may not use ResNet to attempt to circumvent protection schemes or exercise security loopholes in any computer or network environment. Port scanning is expressly forbidden.
