Missing Horizontal Bar in Grade Center

There has been a problem with the horizontal slide bar under the grade center not appearing. This issue seems to occur only when using a Mac.

1. Launch System Preferences, either from the Dock or from the Apple menu.

2. Once the system preference is opened, click on General.
3. In the general options, go to where it says Show Scroll Bars and click on the button that says Always.

4. This should enable you to see the horizontal scroll bar within the grade center after you either refresh the page or close and re-open the browser.
