

Plan for Lifting of the Pause on Face-to-Face in Person Human Subjects Data Collection in Effect due to COVID-19

At the appropriate time, in concert with the University's policy on social distancing, the CSUB Human Subjects Institutional Review Board (HSIRB) will lift its pause on face-to-face in person data collection on human subjects in alignment with the [State of California Pandemic Roadmap](#), CSU, and CSUB guidance and/or directives.

This plan includes all human subjects research activities conducted by principal investigators, research assistants, and student assistants, whether supported by the university, by grants, or otherwise at the main and satellite campuses as well as any off-campus sites of data collection.

Goal: Resume human subjects research activities as fully and as quickly as safely possible.
