Class Climate in Blackboard

Class Climate offers a new method of checking the response rate for online SOCI using Blackboard. While this tool is hosted in Blackboard, it does not require instructors to have course materials in Blackboard, nor does it require that students be logged in to Blackboard to use the online survey tool. This tool only provides aggregated data to allow faculty to gauge the overall response rate for the classes. When comparing to the previous system, the response rate is now updated in real-time vs. only once per day.

To use this tool, you do not need to be actively using Blackboard, but you do need a course in Blackboard that you are assigned as an instructor to access the tool. With PeopleSoft -Blackboard integration now enabled, all instructors should have one or more Blackboard classes assigned to them.

How to check Class Climate online survey response rates

1. Log into CSUB Blackboard.

Navigate to <u>https://bb.csub.edu/</u> or click on the link on the <u>www.csub.edu</u> homepage.

5. Scroll down and click on "Class Climate"

6. The Class Climate tool should launch automatically, and you will see data similar to what is below:

If you have multiple surveys, they will all show up here.
