Respondus – Online Proctoring Tool

What is Respondus?

Lockdown Browser

- LockDown Browser® is a custom browser that locks down the testing environment within a learning management system.

Monitor

- Monitor® builds upon the power of LockDown Browser, using a student's webcam and industry-leading video analytics to prevent cheating during non-proctored exams.

Things to know - Respondus Lockdown Browser and Monitor

- Both tools are already present within Blackboard and Canvas
    - Canvas – You'll see Lockdown Browser in the list of course modules.
    - Blackboard – You'll see Lockdown Browser under "Course Tools".
- Faculty will be presented with helpful resources when they open the tool within Canvas/Blackboard.

- There is a video recorded Webinar focused on teaching Faculty how to use it: http://web.respondus.com/monitor-training/
- The link to access and download the Lockdown Browser for *students* is located under:
    - Getting Started > Information for your Syllabus and Course Description or we can post the link for faculty to give to students here: https://download.respondus.com/lockdown/download.php?id=712114039
