Subject: Interim Directive 23-04: Calls Regarding Kit Fox Issues

This directive is designed to provide direction for calls regarding the endangered San Joaquin Kit Fox where the situation does not involve a deceased or injured animal.

If a caller calls to report an incident involving a kit fox issue not covered in directive 23-2 (Death or Injured Kit Fox), a call for service should be generated. An officer should be assigned to the call and a RIMS report generated documenting the call and the outcome. There is a RIMS call type option of "KITFOX," which should be used for such reports.

This directive will remain in place until such time when the Incidental Take Permit (ITP) is completed in place for CSU Bakersfield.
