

CSUB Advising Council			
<p>Function: The CSUB Advising Council serves as a collaborative forum that brings together staff and faculty from across the campus to support and strengthen academic advising practices. By fostering open communication among departments and divisions, the Council promotes a shared understanding of advising goals and challenges, helping to ensure that students receive consistent and coordinated support. The Council focuses on identifying and discussing advising-related needs, sharing the best practices, and recommending strategies to enhance the advising experience for both students and advisors. It also plays a key role in recognizing the professional development needs of staff and faculty advisors, advocating for resources and training to support their work. Meeting at least three times per semester and co-chaired by the Vice President of Strategic Enrollment Management and Student Support (or designee) and the Chair of Academic Senate (or designee), the Council functions as an advisory body that encourages campus-wide collaboration and contributes valuable insights to inform advising initiatives.</p>
