Philosophy For Children (K-6)

Join us this Fall in our Philosophy for Children (P4C) events at Beale and Southwest Libraries.

In P4C events, we undertake thought experiments, read books, ask questions, and discuss the ensuing philosophical issues together. Our aim is for the participants to figure out what they think about the topic in question and then reflect on their own thinking process and share their reasoning with their peers. These conversations foster critical thinking and collaborative learning skills as all participants are part of a community of inquiry.
